

B.Sc. Honours in Anthropology

Programme Specific Outcome

- 1.** Anthropology is the study of what makes us human. Students will gain knowledge understanding the many different aspects of the human experience, which we call holism.
- 2.** They will read and understand the various elements of humans, including biology and culture, in order to understand human origin and the evolution of various beliefs and social customs
- 3.** They will study the human race, its culture and society, and its physical development from socio-scientific perspectives.
- 4.** It will enrich students' knowledge and skill about this science that deals with the origins, physical and cultural development, biological characteristics, and social customs and beliefs of humankind.
- 5.** They will read generally three subfields of anthropology. Each of the subfields teaches distinctive skills. However, the subfields also have a number of similarities. For example, each subfield applies theories, employs systematic research methodologies, formulates and tests hypotheses, and develops extensive sets of data.

B.Sc. Honours in Anthropology

Course Code	Course Name	Course Outcome
ANTHCC01	CT1: Introduction to Biological Anthropology	It helps to gain knowledge about the past and present evolution of the human species and is especially concerned with understanding the causes of present human diversity. It encompasses human palaeontology, evolutionary biology, human genetics, comparative anatomy and physiology, primate behaviour, human behavioural ecology, and human biology.
ANTHCC02	CT2: Introduction to Socio-cultural Anthropology	It helps to understand the human similarities and differences and their impact on a wide range of social phenomena through the methods uniquely suited to studying social phenomena at different scales within a historical and political context as well as it helps to analyze what unites diverse peoples as well as what distinguishes them from one another.
ANTHCC03	CT3: Archaeological Anthropology	It enriches the knowledge about the systematic study of human past through material remains and also how to examine diverse remnants of human actions through excavation, recovery, and material analyses. Cultural systems through time and space are reconstructed by examining ancient social, political, religious, and economic systems through both a regional and comparative perspective.
ANTHCC04	CT4: Fundamentals of Human Origin and Evolution	It gives understanding in relation to human evolution, the process by which human beings developed on earth from now-extinct primates.
ANTHCC05	CT5: Tribes and Peasants in India	Gain Knowledge about the socio-cultural and economic life of the tribes and peasants.
ANTHCC06	CT6: Human Ecology : Biological & Cultural Dimensions	Biological and cultural dimensions of human ecology are studied in this paper.
ANTHCC07	CT7: Biological Diversity in Human Populations	Students able to understand the biological diversity in human populations.
ANTHCC08	CT8: Theories of Culture and Society	This paper helps to gain knowledge about various theories of culture and society as developed by the pioneered and leading anthropologists of the world.
ANTHCC09	CT9: Human Growth and Development	Students will get basics, importance and understanding of human growth and development from anthropological perspectives.
ANTHCC10	CT10: Research Methods	Learn about the tools, techniques, and methods of doing anthropological socio-scientific research at empirical context.

B.Sc. Honours in Anthropology

ANTHCC11	CT11: Human Population Genetics	Understand about the human population genetics and its related subject matters.
ANTHCC12	CT12: Anthropology in Practice	Enhances the ability of students for understanding the role of anthropology in human development and progress through the application of its knowledge in practice.
ANTHCC13	CT13: Forensic Anthropology	Gain knowledge about the processes involved in the application of scientific techniques and principles to the identification of the deceased through the systematic study of skeletal or fragmentary remains in order to create a biological profile for the deceased which includes ancestry, sex, age at death and stature. Other assessments may include the analysis of trauma or pathologies.
ANTHCC14	CT14: Anthropology of India	Translate the gained knowledge, skills and training to their own personal interests and immediate benefits.
ANTHGE01	GE-1: Nutrition and Health	Gain knowledge about the concept of human nutrition, malnutrition, health, illness, and well-being.
ANTHGE02	GE -2: Research Methodology	Learn about the tools, techniques, and methods of doing anthropological socio-scientific research at empirical context.
ANTHGE03	GE-3: Tribes and Culture	It gives insight in understanding the knowledge about the tribal folks, their social system, culture, problems etc. and the role culture in their life from anthropological perspectives.
ANTHGE04	GE-4: Introduction to Prehistoric Anthropology	Know the basic idea about the systematic study of human past through material remains and also how to examine diverse remnants of human actions through excavation, recovery, and material analyses. Cultural systems through time and space are reconstructed by examining ancient social, political, religious, and economic systems through both a regional and comparative perspective.
ANTHSE01	SEC-1: Business and Corporate Anthropology	Gain knowledge about data, different measurements of statistics, bioinformatics & health informatics.
ANTHSE02	SEC-2: Tourism Anthropology	Learn the role of different nutrients during pregnancy & lactation & common problems during these time period.
ANTHDS01	DSE-1: Sports and Nutritional Anthropology	Students will get information and understanding of the physical fitness, component of physical fitness, relation between nutrition and sports etc. from anthropological viewpoint.
ANTHDS02	DSE-2: Paleoanthropology	Learn human evolution through the fossil and archaeological records.
ANTHDS03	DSE-3: Tribal cultures of India	Understand variety of aspects regarding tribal lives, their social system, culture, problems, movements, continuity and change, etc. from anthropological perspectives.
ANTHDS04	DSE-4: Project Work	Here, under the guidance and monitoring of teachers, students will learn a series of activities that allows them to study, conduct research on a variety of relevant topics chosen by the students.
