

B.Sc. Honours in Anthropology

Programme Specific Outcome

- 1.** Anthropology is the study of what makes us human. Students will gain knowledge understanding the many different aspects of the human experience, which we call holism.
- 2.** They will read and understand the various elements of humans, including biology and culture, in order to understand human origin and the evolution of various beliefs and social customs
- 3.** They will study the human race, its culture and society, and its physical development from socio-scientific perspectives.
- 4.** It will enrich students' knowledge and skill about this science that deals with the origins, physical and cultural development, biological characteristics, and social customs and beliefs of humankind.
- 5.** They will read generally three subfields of anthropology. Each of the subfields teaches distinctive skills. However, the subfields also have a number of similarities. For example, each subfield applies theories, employs systematic research methodologies, formulates and tests hypotheses, and develops extensive sets of data.
